

TECHNOLOGY SERVICES

Smart Technology. Stronger Government.

Practical technology services that improve cybersecurity, infrastructure, cloud systems, communications, help-desk support, and day-to-day IT reliability.

CORE SERVICES

✓ **Cybersecurity**

Strengthen cybersecurity through risk assessment, access controls, policies, endpoint protection, awareness, and incident preparedness.

✓ **Network Management**

Maintain reliable network infrastructure through monitoring, configuration, troubleshooting, documentation, and performance management.

✓ **Cloud Computing**

Plan and support secure cloud solutions that improve accessibility, scalability, resilience, and operational efficiency.

✓ **IT Support & Help Desk**

Provide responsive user support for hardware, software, accounts, connectivity, and routine technology issues.

✓ **VOIP**

Implement and support voice-over-IP communications to improve telephone functionality, flexibility, and cost management.

✓ **Data Cabling**

Coordinate structured data cabling for reliable network, voice, security, and technology connectivity.

✓ **Technology Planning**

Develop technology roadmaps, priorities, budgets, standards, and lifecycle plans aligned with organizational needs.

✓ **Hardware & Software Support**

Install, configure, maintain, and troubleshoot computers, peripherals, applications, and related technology assets.
